BRIDGE REPAIRS ON SPAULDING TURNPIKE IN ROCHESTER
DECK, RAIL, AND CURB REPAIRS TO BRIDGE OVER BLACKWATER ROAD

The New Hampshire Department of Transportation bridge repairs are scheduled to begin Wednesday, April 13, 2005 on the Spaulding Turnpike Bridge over Blackwater Road in Rochester.

This project involves bridge deck, rail and curb repairs and is expected to take six weeks to complete. Daily work hours will be 7:00 am until 3:00 pm. Occasional lane closures and minor delays can be expected. Warning signs, barrels, and concrete barriers will be used to assist motorists through the work zone.

Trucks over 12 feet six inches in height that would be traveling under the Spaulding Turnpike on Blackwater Road should seek alternate routes.
